

HHA-507-2025

HHA 507 Data Science Health Informatics 2025

Overview

This repository contains course materials, datasets, and code examples for HHA 507 Data Science in Health Informatics. The course focuses on practical data science applications in healthcare, working with medical coding systems, and health data analysis.

Getting Started

1. Cloning the Repository

To get a local copy of this repository on your machine, use the following git commands:

```
# Clone the repository to your local machine
git clone https://github.com/yourusername/HHA-507-2025.git

# Navigate into the repository folder
cd HHA-507-2025

# Check the status of your local repository
git status
```

2. Basic Git Commands You'll Need

```
# Check if there are updates to download:
git pull
```

Tools You'll Use

- **Python:** Primary programming language
- **Pandas:** Data manipulation and analysis
- **Jupyter Notebooks:** Interactive data exploration
- **Git/GitHub:** Version control and collaboration
- **VS Code:** Code editor

Common Issues and Solutions

- **Large File Errors:** If Git complains about file sizes, check that your datasets are properly listed in `.gitignore`
- **Memory Issues:** Large CSV files may require chunked processing in Python
